

# IMAGE ANALYSIS & STEREOLOGY

formerly ACTA STEREOLOGICA

---

## Editor-in-Chief

IDA ERŽEN (Slovenia)

## Honorary Editor

MIROSLAV KALIŠNIK (Slovenia)

## Associate Editors

YANNICK ANGUI (France)  
image analysis; applications

YRJÖ COLLAN (Finland)  
applied stereology; quantitative pathology

WERNER NAGEL (Germany)  
stereology; stochastic geometry and statistics

LESZEK WOJNAR (Poland)  
image analysis; materials science

## Editorial Board

J.O. Archambeau (USA)

J. Astola (Finland)

V. Beneš (Czech Republic)

J. Bertram (Australia)

J.L. Chermant (France)

R. Coleman (United Kingdom)

L.M. Cruz-Orive (Spain)

E.R. Dougherty (USA)

E. Enns (Canada)

U. Hahn (Germany)

P. Herlin (France)

D. Hyde (USA)

D. Jeulin (France)

K. Kiêu (France)

P. Stroeven (The Netherlands)

H. Talbot (Australia)

M. Tanemura (Japan)

J. van Pelt (The Netherlands)

H.B.M. Uytings (The Netherlands)

D. Vollath (Germany)

---

**Aims and Scope of the Journal.** This is the official journal of the International Society for Stereology. It promotes the exchange of scientific, technical, organizational and other information on the quantitative analysis of data having a geometrical structure, including stereology, differential geometry, image analysis, image processing, mathematical morphology, stochastic geometry, statistics, pattern recognition, and related topics. The fields of application are not restricted and range from biomedicine, materials sciences and physics to geology and geography.

**The journal publishes three types of papers.** First, **original research papers** (full-length research papers and short communications) pertaining to various aspects of image analysis and stereology and related quantitative methods for geometric structures, texture and patterns, from mathematics and instrumentation to statistical and computational methods, both theoretical and applied. Second, **review articles** written in a form understandable to a non-specialist. Third, **book reviews, news, communications and notes** pertaining to the life and work of stereologists and their organizations. Prospective authors of the third type of publications should contact the Editorial Office before submission of a manuscript.

**This journal is regularly indexed or abstracted in:** Cambridge Scientific Abstracts, Chemical Abstracts, INSPEC, MATHSciNet, METADEX, Referativnyj Zhurnal and Zentralblatt MATH.

The journal's owner is the Slovenian Society for Stereology and Quantitative Image Analysis. The Journal is financially supported by the International Society for Stereology and the Slovenian Research Agency.

## Price and Subscription Conditions

The journal is issued three times yearly. Annual subscription price (excluding bank charges) is €76 for European countries and €97 outside Europe. The journal subscription is included in the basic, student or emeritus ISS membership. All payments should be addressed to Slovenian Society for Stereology and Quantitative Image Analysis, Korytkova 2, SI-1000 Ljubljana, Slovenia. Two methods of payment are acceptable: (i) an Eurocheck by registered mail or (ii) a bank to bank transfer to the Society's account at *NOVA LJUBLJANSKA BANKA, d.d., Ljubljana*, IBAN: SI56020140015049611, S.W.I.F.T. Code: LJBAS12X with obligatory notification "*NN for Image Analysis & Stereology*". Please mail a copy of the receipt for the money transfer order to the Editorial Office when using the latter method of payment.

## Copyright/Off-prints

Authors submitting a manuscript to Image Analysis and Stereology do so on the understanding that if it is accepted for publication, exclusive copyright of the paper shall be assigned to the journal. There will be no limitation on the personal freedom of the author to use material contained in the paper in other works. No free off-prints are available, but they may be ordered by the authors at extra cost according to the special price list that will be sent to the authors together with an order form.

**Printed by** Littera picta d.o.o., Rožna dolina, c. IV/32/34, Ljubljana, Slovenia.

## Inquiries

Please contact the Editorial Office for

- general inquiries
- subscription
- requests for permission to reproduce figures, tables and articles
- information on purchasing reprints of articles
- manuscript inquiries

## INSTRUCTIONS TO AUTHORS

The journal publishes **full-length** original research papers and **short** research communications, review articles, book reviews, news, communications and notes. Submission of a paper to Image Analysis and Stereology is understood to imply that it has not been previously published (except in abstract form) and that it has not been submitted for publication elsewhere at the same time. Every effort will be made to notify authors about acceptance, necessary revision or rejection within 12 weeks from the date of receipt of a manuscript. Every manuscript is reviewed by two independent referees.

Manuscripts should be submitted electronically in pdf or ps format for reviewing purposes, after acceptance they should be written within LaTeX template or provided as a Word file. If not electronically submitted an **original and 2 complete copies** of each paper should be submitted to the Editorial Office and addressed to Image Analysis and Stereology Editorial Office, Institute of Anatomy, Medical Faculty, Korytkova 2, SI-1000 Ljubljana, Slovenia.

**E-mail correspondence.** Please send manuscripts to

[Editor.IAS@mf.uni-lj.si](mailto:Editor.IAS@mf.uni-lj.si)

and all inquiries, including manuscript inquiries before or after acceptance, to

[IAS@mf.uni-lj.si](mailto:IAS@mf.uni-lj.si).

For rapid and accurate publication it is essential that manuscripts follow exactly the guidelines described below. If not submitted by e-mail, authors are requested to accompany the final printed version of a manuscript (*including original figures*) with an electronic copy on a CD. The electronic version of a manuscript should be written in MS Word (ver. 6.0 or higher), RTF format, or LaTeX. Style file in LaTeX is available on the IAS website or can be E-mailed on request.

Figures submitted in electronic form should be sent as TIFF files for raster images (bitmaps) or PS format for vector images. TIFF files should have 200-300 dpi resolution for colour or greyscale images and 600 dpi for black and white images. If necessary, please contact the Editorial office for additional information on figure preparation.

**Language** is English. Please be consistent. Use the same form of English (UK or American) throughout the text.

**Length.** Full-length research papers or full-length review articles printed in the final format should not exceed 15 pages including tables and figures with legends and references. Short research communications, reviews, communications or notes should not exceed 7 pages including tables and figures with legends. **Title.** Short and to the point; include all key words if possible. Not longer than 120 characters (including spaces), it should be written entirely in capital letters. **It should indicate the methodological aspects of the paper, which are of interest also for several fields of application.** Include the running title with the surname of the first author with no more than 100 characters including spaces (e.g., MACKAY CE ET AL: Comparison of MRI and physical sections).

**Authors.** Whole name(s) and family name of each author; no academic degrees or titles. Indicate who will be responsible for correspondence, if not the first author. Complete address of each author including an e-mail address.

**Abstract.** Not more than 250 words, summarizing the work presented in the manuscript, in 3<sup>rd</sup> person. **Abstract should be understandable to a nonspecialist. It should be followed by a list of keywords** (not more than 6 in alphabetical order). **Keywords should allow an appropriate classification of the paper in regard to the methodology and field of application.** Use extra line and lower case letters.

**Text.** Sufficient details must be given to enable the interdisciplinary audience of the journal to understand the considered problem and the methods. This includes a brief explanation of basic concepts, abbreviations and symbols, and, if available, a reference to a standard textbook. The problem of interest should be

described clearly and explicitly. Methods which are of some general character should be emphasized. New methods or theoretical results should be given with an appropriate reasoning or derivation. Applications of methods are welcome. Appropriate real data, simulation or numerical results should be given to illustrate the main results. If possible, use standard headings: *Introduction, Materials and Methods, Results, Discussion, Acknowledgements and References*. The headings should be placed on separate lines and written in capitals with no underlining. Avoid unnecessary subheadings. In the text do not underline words, do not use letters in bold type.

**Figures and Tables** should be in a form and condition suitable for publication across a single column (8 cm - font size 10) or a whole page (18 cm - font size 12). The minimum font size of characters is 10. Figures and tables should be numbered consecutively in *Arabic numerals* (e.g., Fig. 1a,b; Table 1) and headed with a short title. If not electronically submitted, they should be printed on separate pages and the preferred point of insertion indicated in the text margin (e.g., insert Fig. 1). Figures and tables should be placed at the end of the manuscript following the reference section. Each figure and table should be accompanied by a self-explanatory legend.

**Micrographs** should be sent as *glossy prints* with magnification indicated by a *scale bar*. Electronic submission is preferred.

**Color Prints.** A limited number of colour images is free of charge.

**Equations** should be placed centrally, on separate lines, with an extra spacing above and below. They should always be numbered, placing the number in brackets against the right hand margin. If a mathematical expression is to be included as a part of a sentence try to maintain the single line spacing by use of brackets (e.g., (1-x)/(3-h)). Please, use an abbreviation (e.g., Eq. 1) when discussing an equation in a sentence.

**Units.** SI units should be used wherever these exist for the parameter concerned. Units should be separated from values (e.g., 5  $\mu\text{m}$ , 2 mg, 1 min); exceptions are  $^{\circ}$ ,  $^{\circ}\text{C}$  and % (e.g., 90 $^{\circ}$ , 37 $^{\circ}\text{C}$ , 50%).

**References** in the text should be given in parentheses: e.g., (Fish, 1971) when there is only one author; (Fish, 1971a,b) when an author has two references in the same year; (Fish, 1971; 1972) when an author has two references in different years; (Flesh and Fowl, 1954) when there are two authors; (Good *et al.*, 1962) when there are more than two authors; (Flesh and Fowl, 1954; Good *et al.*, 1962) when there is more than one reference; "as shown by Miller (1967), the ..." when author's name is part of a sentence. If the same authors have more than one publication in one year, then distinguish them, thus: 1985a, 1985b, etc. The reference list should be in alphabetical order and prepared according to the examples below:

Macpherson IA (1973). Soft agar technique. In: Kruse PF, Patterson IMK, eds. Tissue culture methods and application. Ch. 7. New York: Academic Press, 276-81.

Osler AG (1976). Complement: Mechanisms and functions. Englewood Cliffs: Prentice Hall, 51-5.

Solter NA, Wasserman SI, Austen KF (1976). Cold urticaria: release into circulation of histamine and eosinophilic chemotactic factor of anaphylaxis during cold challenge. *N Engl J Med* 294:687-90.

Bengtsson S, Solheim BG (1992). Enforcement of data protection, privacy and security in medical information. In: Lun KC, Degoulet P, Piemme TE, Rienhoff O, eds. MEDINFO 92. Proceedings of the 7<sup>th</sup> World Congress on Medical Informatics, 1992 Sep 6-10; Geneva, Switzerland. Amsterdam: North-Holland, 1561-5.

"Personal communications", "unpublished observations" and "in preparation" should be given in the text and should not appear in the reference list.

**Page Numbering.** Pages in the manuscript should be numbered in Arabic numerals starting with the cover page.
